

```
public class Swan {  
  
    private int numberEggs; // private  
    public int getNumberEggs() { // getter  
        return numberEggs;  
    }  
    public void setNumberEggs(int numberEggs) { // setter  
        if (numberEggs >= 0) // guard condition  
            this.numberEggs = numberEggs;  
    }  
}
```
